This field should be blank for most students as the MSDS School or Facility Number will pull from the 5-digit state assigned number that is defined in the Schools/School Info page.

IAM students should have the number 09886 entered in this field.

ECM students should be reported with their local high school state assigned number.

Search for students who have a value in this field: /S_MI_STU_GC_X.adminunit#

Student Resident Membership Code (Fall, Spring, EOY)

Field Name: S_MI_STU_GC_X.residentMembership (run at district or building level)

It is a good practice to verify that all students have a residency and verify that residency codes are accurate. For example, a student that may have been living outside of your district last year, may be living in your district this year so their code would have to be changed from non-resident to resident.

There are several ways to search on this code:

1. Run the Official Enrollment Student Roster report (System Reports > State Reporting Tab). Look at the Res Code column. You may want to run this at a building level since the report can be lengthy.
2. Search for students without a residency code (equal to blank): /S_MI_STU_GC_X.residentmembership=
3. Search for students with a residency code other than 14: /S_MI_STU_GC_X.residentmembership#14
