PowerScheduler: Double Courses Displaying in Course List

Double courses showing in Course list when in PowerScheduler/Update Selections/SchedulingCourseCatalog and 2 of each course is showing in list.

The reason for the duplication is that PowerSchool multiple catalogs. To correct:

In DDE find the correct catalog ID – ScheduleCatalogs and search by SchoolID = xxxx

List View them and select the correct catalog – jot down the ID

In PScheduler Update Selections select Scheduling Course Catalog and Search by CourseCatalog ID = xxxx and you should only get those courses.

Each time you go in there you may have to sort by ID = xxxx
